

Environmental Policy Statement

March 2011

Section.3.01 Iss:G8

Page 1 of 1

Quartzelec Ltd, and all of its subsidiaries, recognise the importance of Environmental Protection and will comply with all applicable environmental legislation, including Railway industry standards, relating to the processes and activities of the Company. As a minimum standard we will at all times cooperate fully with all regulatory bodies and interested parties to ensure that happens.

It is the Company's objective, to protect and conserve the environment, prevent pollution and reduce where possible any negative environmental effects. Prior to any purchase, installation or commencement of any process or system, a formal design review will be conducted to assess the environmental impact and ensure the efficient use of energy, natural resources and minimise waste, disposing of any residual waste safely and responsibly.

The Senior Management is committed to providing adequate resources for the management, implementation and improvement of the Environmental Management System. In recognition of the importance of our staff in ensuring the environmental matters are correctly implemented and managed, we are committed to ensuring they are properly informed and trained where relevant to increase their awareness and active involvement.

The Company will work to continually improve its environmental performance and we will involve customers, partners, clients, suppliers and subcontractors in the implementation, and reviewing of our objectives and targets.

This policy will be displayed in all units and made available to all personnel working for and on behalf of the Company and the general public on request.

In order to measure the effectiveness of this policy, a management audit and review will be carried out at not more than 12 monthly intervals.

D.Laval
Manager Director
